SELF INTRODUCTION

First of all, I would like to express greetings to all of you from the bottom of my heart. After graduation from high school in 1999, I attended Bible College at a Korean missionary school, now called Life University in Cambodia. After studying at the Bible College about six months, I got a scholarship to study Computer Science for a Bachelor degree at Handong University and a Master degree at Soonchunhyang University in Korea. My major was Information Technology and Information Security.

After graduation, I returned to Cambodia's Life University at Sihanoukville. I have served the university as an IT lecturer for 3 years. Through my experience and work at Life University, I have developed a compassionate approach and commitment to assisting Cambodian students with IT knowledge and abilities.
